-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 25 October 2006.
2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Drawings

1. **Figure 5** should be designated by a legend such as **--Prior Art--** because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

2. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The following title is suggested: Printer With Gear Fitting Member For Mounting Drive and Idler Gears.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Mori *et al.* (US 2001/0001273).

With respect to claim 1, Mori *et al.* discloses a printer including a platen roller 80, for conveying a recording sheet, a print head 70, arranged opposite the platen roller, a drive unit, for rotating the platen roller 80, and a main frame 60, including a pair of side walls 61, 62 that can rotatably support the platen roller 80, characterized in that:

the drive unit includes a motor 72, idler gears 93, 94, for transmitting a rotational force provided by the motor to the platen roller, and a gear fitting member 92, integrally formed with gear support shafts 90, 91 that support the idler gears 93, 94 (Mori *et al.*, paragraph [0080]). The motor and idler gears are capable of being mounted in the main frame while attached to the gear fitting member, as shown in Fig. 4 of Mori *et al.*

Additionally, Mori *et al.* discloses a drive gear 72a of the motor and the idler gears 93, 94 are stored in a space defined by the gear fitting member; and one of the side walls of the main frame as shown below in the Fig. taken from Fig. 4 of Mori *et al.*

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 2-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mori *et al.* (US 2001/0001273) in view of Wang (US 4,763,031).

Mori *et al.* disclose the claimed printer except that they do not specify the material that the gear fitting member is made of. However, Wang teaches making a gearbox by die casting

zinc alloy (Wang, Col. 1, lines 61-63). It would have been obvious to combine the teaching of Wang with the printer disclosed by Mori *et al.* because zinc alloy is rigid, non-corrosive and inexpensive.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to **Daniel J. Colilla** whose telephone number is **571-272-2157**. The examiner can normally be reached on M-F 7:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, **Judy Nguyen** can be reached at **571-272-2258**. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
